This diagram illustrates the internal structure of a ship's hull, showing a cross-section from the keel to the deck. Key components labeled include:

- Keel:** The central longitudinal structural member at the bottom.
- Ribs:** Transverse structural members supporting the hull plating.
- Bulkheads:** Vertical partitions that divide the hull into compartments.
- Deck:** The upper horizontal structural member.
- Internal Framing:** A network of diagonal and horizontal members providing structural integrity.

The diagram uses various line styles and shading to represent different materials and structural elements, with labels (A through Z) identifying specific parts for reference.
